SUMMARY

Frontend engineer working in TypeScript and Next.js. Currently shipping an insurance backoffice in production at Etap Insure, including underwriter wallet settlements with role-based access and PIN confirmation. Comfortable owning features end-to-end and working directly with backend APIs, design systems, and cross-functional teams.

WORK HISTORY

Frontend Developer 2025 to Present (Full-time)

Etap Insure

Project: Balloon — Insurance Backoffice & Landing Page

- Owned major parts of the Balloon frontend, including the wallet, policy, and admin modules, plus the public marketing landing page, both shipped to production.
- Shipped a multi-step underwriter payout flow — select pending transactions, preview settlement, choose destination account, confirm with PIN — with conflict and rejected-transaction handling from the API.
- Implemented role-based access (platform admin, underwriter admin, view-only) and transaction PIN setup/update/reset with PIN-lock handling, so payouts require more than a password.
- Wired wallet data with TanStack Query and Axios, with shared error parsing for 4xx and conflict responses.

Tech: Next.js, React, TypeScript, TanStack Query, Zustand, Formik, Yup, Tailwind CSS, Axios

Project: ETAP Insure — Public Site & Ops Backoffice

- Shipped the public site at etapinsure.com, including the car insurance quote flow, plan selection, pay-monthly, and claims pages.
- Implemented core modules of the internal ops backoffice — customers, policies, claims, vehicle-lookup leads, and admin users — including a leads workspace with table views and CSV export.
- Contributed to claims and policy flows: claim documents, settlement notes, policy edit/renewal, proof uploads, and enterprise policy selection.
- Shipped via GitHub and Vercel across staging and production, including PR reviews and hotfixes.

Tech: Next.js, React, TypeScript, Chakra UI, Redux Toolkit / RTK Query, Formik, Yup, TanStack Table

Frontend Developer 2025 to Present (Contract)

Jilcon

- Contributing to BuildEstimate, a construction takeoff and cost-estimation platform, built with React, Redux, and Ant Design.
- Contributing to ProPulse, a client-update tool giving clients real-time visibility into project status without installing software.
- Implementing a headless vs. presentational component architecture and shared theming with Styled Components and Ant Design across both apps.

Frontend Developer 2025 to 2026

Fotolocker — Photo Proofing & Delivery Platform

- Solo-owned the frontend for Fotolocker, a photo proofing and delivery platform for photographers, including client galleries, picture selection, and invoicing, as the only frontend developer on the product.

Frontend Developer 2024 to 2025

Duduzili — Social Media App

- Contributed to core social features: content feed with posts, likes, comments, and sharing.
- Implemented groups/communities, events, in-app messaging, and live streaming/media playback, using React, Redux, and Mantine UI.

Frontend Developer 2023 to 2024

AFEX Nigeria

- Contributed to an internal budget management system covering spend tracking against budgets, approvals, and reporting.
- Contributed to an internal ticketing system for issue tracking, including issue creation, status tracking, assignment, and in-app chat.
- Contributed to an internal HR system covering employee records, leave/attendance, onboarding, payroll views, org chart, and performance reviews.

EDUCATION

Bachelor of Science, Chemistry

Federal University of Agriculture, Abeokuta (2018 – 2023)

SKILLS

TypeScript / JavaScript · React.js / Redux / Redux Toolkit · Next.js · TanStack Query / TanStack Table · REST APIs · Role-based access control (RBAC) · Form validation (Formik, Yup) · Chakra UI / Tailwind CSS / Styled Components · Agile methodologies · Version Control / CI/CD
